STONEMADE
JAIPUR

THE LOTUS

COUNTER TOP BASIN

Banswara White

DIMENSIONS: 19X19X8 CM

HANDLING & UNPACKING

INSPECTION UPON ARRIVAL
Inspect the crate and packaging for any visible signs of transit damage before opening. If damage is evident, contact Stonemade or your supplier prior to unpacking.

OPENING THE CRATE
Remove the designated fasteners and protective panels carefully. Avoid using sharp tools near the stone surface.

PRODUCT REMOVAL
Remove all protective materials before handling. Always lift stone pieces vertically and support them from their structural base. Never drag, slide, or lift from unsupported sections.

INSTALLATION
Due to the weight and nature of natural stone, installation should be performed by qualified professionals using appropriate handling equipment and installation methods.

For products supplied in knock-down (KD) form, please refer to the accompanying Knock-Down Assembly Manual for detailed assembly and installation instructions. The manual should be reviewed in full prior to installation.

CARE & MAINTENANCE

ROUTINE CLEANING
Clean with a soft microfiber cloth and a pH-neutral, alcohol-free stone cleaner. Wipe dry after cleaning to preserve the surface finish.

AVOID
Do not use acidic cleaners, anti-limescale products, bleach, ammonia, degreasers, abrasive powders, or scouring pads, as these may damage the stone.

NATURAL STONE
Variations in colour, veining, texture, and mineral composition are inherent characteristics of natural stone and contribute to the uniqueness of each piece.
